

# CITS Proceedings Rostock 2007

## New Technologies in the Sugar Industry Ethanol and Renewable Biofuels from Sugar Beet General Sugar Technology Issues

*Peter W. Rein* Developments in sugarcane processing over the last 25 years

*Mohsen Ajdari Rad, G. Schrevel, Stefan Frenzel:*  
Separation of a proteine-containing fraction from prelimed juice

*Paul Bussmann, Ronald Vroon, Jan Timmer, Floor Boon, Jan Maarten de Bruijn:*  
Process innovation in the sugar industry: Chromatographic sugar separation using SMB technology

*Walter Hein, G. Rösner, F. Emerstorfer:*  
Measures to prevent operating troubles caused by dextran

*Christa Hoffmann:* Beet quality in the supply chain – requirements and prospects

*Pascal Christodoulou, Stella Bezergianni:*  
The competitiveness of bioethanol production from sugarbeet

*Elena Tamburini, G.L. Marchetti, G. Lenzini, Giuseppe Vaccari:*  
Simplified technology for integrated production of sugar and biofuels

*Emmanuel Duffaut, Fernando Martin Dominguez, Jaime Sagrista Carner:*  
Vinasses as a processing aid in construction material's manufacturing

*Evžen Šárka, Zdeněk Bubník, Pavel Kadlec:*  
Image analysis as a control tool for the reduction of lime consumption in a sugar factories

*Krzysztof Urbaniec, Elena Tamburini Giuseppe Vaccari:*  
New technologies for sustainability of the European sugar industry

*Abdelfattah Bensouissi, Céline Rousse, Barbara Rogé and Mohamed Mathlouthi:*  
Effect of selected impurities on sucrose crystal growth rate and granulated sugar quality

*El-Sayed Abdel-Rahman, Rudolf Schick, Thomas Kurz:*  
Influence of dextran on sucrose crystallization

*Giorgio Pezzi, Fabio Filippini, Sergio Bertuzzi:*  
Integrated treatments of the sugar beet extraction with less residue in the beet pulp and better sugar quality

Garry Bowler: British Sugar experiences with organic sugar production

*S. Mato Cuadrado, M.T. García Cubero; M. Coca Sanz, G. González Benito:*  
Demineralization of sugarbeet solutions by ion exchange technology

*Stephan Traganitis, Pascal Christodoulou:*  
Experiences from the application of the new technology of the falling film plate evaporators in a beet sugar factory

*Christa Hoffmann:*  
Impact of agronomic measures on changes of beet quality during storage

*Jasna Grbić Rada Jevtić-Mužbabić, Nikola Dokmanović:*  
The effect of impurities on the sucrose crystal growth rate

*B. Fernandes, F. Maniscalco:*  
Peracetic acid as green biocide for sugar diffusers

*S. Castaldini:*  
Control systems PCS7 and M.I.S. together for the complete automation of the process in the sugar-beet factory of Co.Pro.B. – Minerbio

*Stanisław Wawro, Radosław Gruska, Jan Iciek, Halina Kalinowska, Alina Kunicka:*  
An effect of high electric field pulses on survival of microbial species ranking among typical microflora of sugar beets

*Valérie Loewenguth, François Rousset, Xavier Lancrenon:*  
NRS for thin juice decalcification

*Marianne McKee, Sara Moore, Ronnie Triche, Charley Richard, Mary An Godshall, Robert Hatch:*  
Analysis of sugarbeet juice, extract, and molasses after treatment with polyaluminum coagulants as a potential processing aid

*Mathis Kuchejda:*  
On-line devices for process monitoring and control of the sugar production

*K.-H. Theisen, I. Geyer:*  
Microwave In-line Brix Control: Latest applications for the instrumentation to monitor density, total solids, concentration, especially Brix in the sugar process

304 Pages, 26 contributions 85 Tables,  
Size 17 x 24 cm. ISBN 978-3-87040-120-7  
Price : Euro135 (+ VAT, where applicable)
