

ESST Proceedings Bratislava 2011

Raw sugar refining New developments Nitrite in molasses Beet quality related to long processing campaigns General sugar technology

G. Ahring and S. Pfau

Comparison of two different techniques for sugar liquor decolourization in a raw sugar refinery

C. Imer and T. Diringler

Economic purification of raw sugar in beet sugar factories

L. Diego, F. Martín, M.G^a de Quevedo and J. Sagristá

Extra colour removal in a refinery

J. Marihart

The challenging environment of the EU sugar industry

P. Wawro, R. Gruska and M. Stanisz

Thickened raw juice – some aspects of thickening and use

R. Grabarczyk, K. Urbaniec, E. Koukios, R. Bakker and G. Vaccari

Options of sugar beet pretreatment for hydrogen fermentation

M. Hünenlage

Lime kilns for beet, cane and refinery processing – improvements and innovations

C. Bergwall

Legionella in sugar factory process waters – Analysis and control in Nordic Sugar

G. Eggleston and J.-M. Huet

The measurement of mannitol in beet sugar factories to monitor deterioration and processing problems

G. Bowler and S. Wones

Application of dextranase in UK sugar beet factories

A. Pollex, B. Kerner, R. Podolsky and F. Czaplá

Sieving machines for smell reduction

A.-J. Waterlander

Legal background and nutritional aspects of nitrite in feed

H. Puke

Nitrite in Feed – an analytical challenge

S. Frenzel and M. Bengtsson

Nitrite in the process – a literature review

W. Hein, H. Bauer and F. Emerstorfer

Processing of long-stored sugar beet

E. Šárka, Z. Bubnik and P. Kadlec

Experience of Czech sugar factories with prolonged campaigns

F. Emerstorfer, W. Hein and H. Bauer

Evaluation of an alternative method for the prediction of the technological beet quality

B.-C. Schulze, O. Tzschätzsch and D. Costesso

Fractal shallow bed ion exchange technology – a flexible solution for today's sugar processing

H. Hafemann and H. Griebel

Applications for drying and cooling sugar in respect of specific needs and ambient conditions

C. Trintignac and B. Gaillac

Technical improvements for digital on-line colour analyzer

208 Pages, 20 contributions plus 8 abstracts,

29 Tables, 161 Figures

Size 16 x 24 cm. ISBN 978-3-87040-143-6

Price : €99 (+ VAT, where applicable)
